Profile

I am an Undergraduate student majoring in Computer Engineering at Diponegoro University, wanting to develop a deep understanding of the world of technology. I have a passion for learning about software development. I have learned about web development, network introduction, and creating animations. I have taken various courses covering aspects of computer hardware and software, which have allowed me to gain multiple skills to prepare myself for the technology field.

Experience

January 2025 – February 2025 Jakarta, Indonesia	Front-End Developer (Internship) <i>PT. Klik Digital Sinergi</i>
July 2024 – August 2024 Jakarta, Indonesia	Front-End Developer (Internship) <i>PT. Telekomunikasi Selular</i>
February 2024 – June 2024 Semarang, Indonesia	Practicum Assistant in Basic Computer and Programming Courses <i>Computer Engineering, Diponegoro University</i> As a mentor and assistant in basic computer and programming courses

Education

August 2022 – present Semarang	Bachelor <i>Diponegoro University</i> Undergraduate in Computer Engineering
July 2019 – May 2022 Jakarta	High School <i>SMA Negeri 55</i> Mathematics and Natural Sciences (MIPA)

Hard Skills

Programming : Java, PHP, Python, JavaScript, TSX, TS, Operating System : Windows, Linux
JSX

Framework : NextJs, Laravel, ReactJs, ViteJs,,
Progressive Web App, Responsive Web Design

Projects

May 2023	Online Basketball Court Booking Website This website is developed using HTML, CSS, JavaScript, and PHP as the core technologies to build the Online Basketball Court Booking system.
May 2024	Selebgram Endorsement Website This Selebgram Endorsement Website is built using HTML, CSS, JavaScript, PHP, and MySQL, enabling creators and brands to manage endorsement requests, profiles, and transactions efficiently

August 2024	Outlet Recognition Website This Outlet Recognition Website is built using HTML, CSS, JavaScript, and Node.js, providing a responsive platform for detecting, managing, and validating outlet data.
February 2025	Klik Digital Dashboard Website This Klik Digital Dashboard Website is developed using the Next.js framework, leveraging TSX, CSS, and JavaScript to build a modern, responsive, and high performance dashboard platform. The system is designed to provide seamless navigation, real-time data interaction, and a clean user interface that enhances the overall user experience. By utilizing Next.js capabilities—such as server-side rendering, component-based architecture, and optimized routing—the website ensures fast loading times and efficient data handling across different devices.
June 2025 – July 2025	SIGAP UNDIP Developed a full-stack web application designed to revolutionize campus safety and emergency response at Diponegoro University. SIGAP UNDIP (Sistem Informasi Gawat dan Pelaporan) is an innovative digital platform that bridges the gap between students, volunteers, and emergency response teams through real-time incident reporting and GPS-enabled panic button functionality.
December 2024	NBA App This NBA App is developed using the React Native framework, utilizing JavaScript and CSS-like styling to deliver a smooth, responsive, and cross-platform mobile experience.
September 2025	Finance Tracker Developed a feature-rich, full-stack personal finance management web application that empowers users to track expenses, manage budgets, analyze spending patterns, and achieve financial goals. This production-ready application combines modern web technologies with robust backend integration to deliver a seamless financial management experience.
November 2025	MotoMarket Developed a cutting-edge e-commerce platform specifically designed for motorcycle enthusiasts to browse, search, and explore motorcycles in an intuitive and visually appealing interface. MotoMarket leverages modern web technologies to deliver a fast, responsive, and engaging user experience for the automotive marketplace sector.
November 2025	Premiere League APP Developed a comprehensive full-stack web application that delivers real-time Premier League data to football fans worldwide. This project consists of two interconnected repositories: a modern React frontend and a robust Next.js API backend, demonstrating end-to-end full-stack development capabilities from database design to user interface.
November 2025	MPL-ID APP Designed and engineered a comprehensive esports management dashboard for the Mobile Legends Professional League (MPL) Indonesia. This Progressive Web App (PWA) serves as a centralized hub for tracking standings, managing team rosters, and monitoring MVP leaderboards.
December 2025	GASPOL System Developed a comprehensive Sales Performance and Credit Simulation platform exclusively for Setir Kanan . The GASPOL System is designed to streamline the automotive sales process by providing real-time financial calculations and lead management tools for sales agents in the field.

Organizations

September 2023 – present	Google Developer Student Clubs (GDSC) Diponegoro University <i>Member</i> • Being a member of GDSC as a bridge between theory and practice to have an interest in developing skills in the field of technology especially Google Technologies
April 2023 – present	Computer Engineering Research Club (CERC) <i>Member</i> • Being a member of CERC in the software field with the goal of improving programming skills, especially in frontend and backend.
May 2024 – present	Himpunan Mahasiswa Teknik Komputer (HIMASKOM) <i>Head of Student Resource Development</i> • As the head of PSDM, Acting as a facilitator and catalyst for developing soft skills, as well as creating a comfortable atmosphere and providing a platform for solving problems objectively.
February 2020 – present	The Multimedia Team of The HKBP Tebet Church <i>Member</i> • Being a member of The multimedia team of the HKBP Tebet church Contributing to the church as part of the Multimedia team, livestreaming, and other spiritual activities within the church.

Certificates

DD Database Design Learner Oracle Academy	CCNAv7: Introduction to Networks Cisco Networking Academy
Coding Bootcamp Progate Module Python Progate Indonesia	Memulai Pemrograman dengan Kotlin  Dicoding Indonesia
Belajar Membuat Aplikasi Android untuk Pemula  Dicoding Indonesia	Belajar Fundamental Aplikasi Android  Dicoding Indonesia
Belajar Dasar AI  Dicoding Indonesia
